whilst small but increasing imports of Japanese

Yarns have found a market here. The import

of Indian Yarns during the past four years at

Shanghai alone averages over 195,000 bales of

three piculs each annually, whilst the principal ports in the South of China have taken during

the same period an average of 136,000 bales.

The demand for Yarns in China might have

been supplied with advantage to producer and

consumer alike by locally established Mills.

An ample supply of Raw Cotton may be

counted upon, as the area of cultivation can be increased indefinitely to supply any increased demand.

As an example of the elasticity of the supply

range of prices the lowest ever recorded.

Besides supplying the local market, the crop

here during the past year has been experted to

the extent of 930,351 picule, an increase within

four years of nearly 50 per cent. The experted

cotton would have kept running 360,000 spindles

in addition to those already at work. It would

thus appear that a scarcity of raw material is

not to be feared, whilst the competition of Indian

and American cotton in Japan will check an

advance beyond normal prices in Chica grown

The supply of labour is limitless, and it is

already demonstrated that the natives soon

Outrages have been, of late, too frequent and, too frequently, premeditated. The prompt and efficient punishment of all persons, officials or others, implicated in these massacres is now the only acceptable answer to our domands. The Chinese Government is utterly unable, even if it were willing, which is more than doubtful, to punish the murderers. All its sympathics are with them. All its officials are implicated either actively or by connivance. -- There exists no where in China any machinery for the administration of Impartial justice. Under these circumstances the Chinese must, in spite of their boasted civilisation, be treated as we treat the savages of New Guinea, and for the same reasons and with the same justification. Chengtu ought to be occupied at any cost; the mandarins taken prisoners and held in custody by us until thorough investigation and punish rent is effected. THUS the New York Literary Digest of the 22nd June :- " Does Hongkong still deserve the name of 'Gibraltar of the Far East?' The Hongkong Telegraph doubts it. Now that Japan has become a naval Power, and exceptionally strong fleets are maintained in the East by the European Governments, the Island does not appear as invulnerable as it was at one time thought to be. The Telegraph thinks England ought to extend her boundaries in that quarter of the world."

As will be seen by special telegrams in this issue the news of the shocking anti-mis-sionary, siots in Fuhkien, published by this journal at r p.m. on Saturday test, is fully confirmed. The whole of the victims are British subjects, members of the English Church Missionary Society, and it is noticeable that the United States Consul and Archdescon Wolfs have exerted themselves in the most laudable manner in the matter of the recovery of the bodies of the martyrs and the rescue of survivors. And one is therefore induced to ask-Is there a British Consul in Foochow? If so, what has he done beyond informing the British Minister by wire of the outrages perpetrated on British subjects?

These concessions, it will be seen, give France .not only important concesions, but afford the ground for future gains. It is intended that France shall have a preponderating influence in the section between Itozaki and Onomichi Colonel Denby and Sir Nicholas O'Conor looks the three south-western provinces, a preponderance which in the event of any weakness of grasp on the part of China, she will be only too ready to take full advantage of.

KOBE, July 27th. As a result of the typhoon experienced on Wednesday night a terrible accident occurred on the Sanyo line, resulting in the death of more than forty soldiers and injuries to many others. It appears that about 0.50 p.m. on Wednesday a train was dispatched from 'Hiroshima, consisting of a locomotive, three brake vans, and nineteen carriages, and conveying a number of disabled soldiers who were being sent back to the headquarters of their respective divisions. Moved with gratitude the Romans surnamed their delty Juno Monets and Money was afterwards coined in her temple. Now it is a curious fact that Chinese when asked to account for the square hole in cash are apt to reply that the shape of the hole was intended originally to incite all men to "practice justice" to " act on the square" or along " right lines." This old-time suggestion has not been wel received. The nation has been satisfied with the presentation of the idea without acting on the

Some of these rare and curious coin-charms will have their own special attractions for the student of Folklore. The sections devoted to them require separate notice as do also those dealing with Annamese, Japanese and Korean coins.

We are promised a further critical notice of this work dealing mainly with the coin shaped amulets and charms, and hope to be able to present it to our readers at an early date.

Ritchie to the Presidency of the Board of Trade it cannot be said to be a case of putting a round man into a square hole, but sather of putting an exceedingly square man into a position for which be is perhaps better qualified than any man in the Ministry. Mr. Ritchie has been brought up to business and is a thorough master of it. From the point of view of Fairplay he is peculiarly qualified for the post, because he has also the exceptional merit of being intimately acquainted with shipping and shipping business, and that, we think, is what cannot be said of any of his predecessors. Mr. Ritc' ie is a statesman who has the opinions, as was proved by his carrying the Local Government Bill, which, in some respects, it is an open secret, was by no means popular with his party. The result, so far as the Lordon gress, a large number of private factories having County Council was concerned, was in the first | been established. The Hongkong Christian Endeavour Society scored another success in their tea and entertainment, held in the Union Church yesterday evening. Each public meeting of the Society seems to increase its usefulness and popularity, and grahaps the most pleasing feature is its grewing membership, amongst the civil population. To be able to draw over a hundred people to a tea and a much larger number to an entertainment on a bank holiday, when there are so many counter-attractions in picnics, &c., speaks well for the enthusiasm which exists amongst its members. Dr. Thomson, who occupied the chair, gave a most interesting address on Medical Missionary effort in Hongkong, and the worthy doctor was accorded hearty applause by his appreciative audience. > THE COTTON SPINNING INDUS-TRY IN JAPAN.

A writer on the staff of the Chue Shimpe has collected a mass of interesting material about the history and the present condition of the cotton spinning industry in Japan. His interesting account of the origin of the earliest spinning factory established in Kagoibima more than forty years ago by the greatest of feudal princes in modern timev, Shimasu Haribisa, was reproduced in the columns of the Japan Mail on July 6th, 1895. The man among nobles turned Prince, was Mr. Kajima Mambel of Tokio, who set up a factory at Oli in 1867, while the country was still disturbed by the war of the Restoration. The machines were of the ring pattern, and the number of spindles was 720. The factory was called Oil Boscki-jo. This was the parent of the present Tokio Spinning Factory.

These were the only spinning factories until 1879, in which year two others were established The selection of Mr. Goschen for appoint- by the Government in Aichi and Techigi. Four in 1883, and one in 1884. These factories, 17 companies and are now in a thriving condition. Their names, and their present number of spindles, are as follow :-
